Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Declaration filed on 10/22/2003 has been received.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sydekum et al (U. S. Patent no. 5,553,713) in view of Handke et al (U. S. Patent no. 5,544,725).

Sydekum et al discloses:

See figures 5 and 5a, cylinder 9, chamber 41, support ring 35, spring collar 13 with sleeve 25

Sydekum et al does not disclose a hardenable material to secure the spring collar. The Examiner would like to note that the term "hardenable material" reads upon glues and adhesives. Handke et al teaches using adhesive such as epoxy to attach the spring collar. See Column 8 lines 40-45. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use adhesive as taught Handke et al in the device of Sydekum et al as the use of adhesives are well known and easy to use.

Additionally, the Examiner would like to note that the term "hardenable material" also reads upon the stock material used in welding which is melted to join the two pieces and hardens to form the weld. Handke et al teaches welding the spring collar (weld 25) to

the cylinder. It would have been obvious to one of ordinary skill in the art at the time the invention was made to weld the spring collar as taught Handke et al in the device of Sydekum et al as welding is a well known method of attaching two metallic pieces with a strong connection.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert A. Siconolfi whose telephone number is 703-305-0580. The examiner can normally be reached on M-F 10 am-3 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Lavinder can be reached on (703) 308-3421. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
